

CSI4142 Fundamentals of Data Science

Project Phase 1: Conceptual Design – Dimensional Model

Youssef Makboul, 8609614

Graydon Hope, 300045044

Billal Zazai, 8572975

Submission Date

February 3th, 2021

(See Last Page for Conceptual Model Figure)

Work Plan

26-01-2021 Tuesday 6:00-8:00

- Discussed member roles
- Assigned coordinator and scribe
- Discussed regular meet-up date and times
- Discussed Project plan
- Registered the group
- Brainstormed potential resources to utilize for project ## 29-01-2021 Friday 6:00-8:00
- Brainstormed ideas on tackling concept Model
- Brainstormed potential use of Constellation Schema
- Discussed latitude of dimension for concept model
- Looked for Data sets to support data mart

31-01-2021 Sunday 12:00-1:00

- Finalized conceptual model
- Assigned roles to group members on what should be accomplished in report

Fact Table

Grain

Covid Outbreak Status(Number of Positive COVID Cases, Number of Recovered COVID Cases, Number of Recovered COVID Cases, Number of Tests, Number of Hospitalization, Number of Case Outcomes, Number of Full Vaccinations) per Location, per Day, per Individual Profile Classification

Fact Table Attributes

Foreign Keys

- Date ID (FK)
- Weather Forecast ID (FK)
- Location ID (FK)
- Mobility Trend ID (FK)
- COVID Outbreak Status ID (FK)
- Individual Profile (FK)

Facts/Measures

- Number of Postive Cases
- Number Recovered
- Number of Tests
- Total Hospitalization
- Total case outcomes (resolutions and deaths)
- Number of full Vaccinations
- Net Mobility Trend Change

Dimensions

- Weather Dimension
 - Weather Forecast
 - Location

- Date(Day)
- Date Dimension
 - Date Stamp (date, minimum = 0001-01-01 and maximum = 9999-12-31, Sample value = 2020-10-01)
 - Day of the week
 - Holiday (y/n)
- Location Dimension
 - Available Testing Locations
 - Public Health Units
 - Restriction Status
- Individual Profile
 - Age Group
 - Gender
 - Case Acquisition
- Mobility Trend
 - retail and recreation percent change from baseline
 - grocery and pharmacy percent change from baseline
 - parks percent change from baseline
 - transit stations percent change from baseline
 - workplaces percent change from baseline
 - residential percent change from baseline
- COVID Outbreak Status
 - reporting date
 - individuals fully vaccinated
 - current hospitalizations
 - tests under investigation
 - test outcomes
 - current tests under investigation
 - current patients in Intensive Care Units (ICUs)
 - current patients in Intensive Care Units (ICUs) on ventilators
 - change in number of cases from previous day by Public Health Unit (PHU)

DataSets Used

- Status of COVID-19 ([Link](#))
- COVID-19 testing locations ([Link](#))
- Confirmed positive cases of COVID-19 in Ontario ([Link](#))
- COVID-19 Vaccine Data in Ontario ([Link](#))
- Community Mobility Reports ([Link](#))
- Restrictions ([Link](#))
- Daily Weather Data Ottawa ([Link](#))
- Daily Weather Data Toronto ([Link](#))

Domain and Sample Values

Date Dimension	Domain	Sample
Date Stamp: Date	Four digit year, month, and day of the month	2021-01-01

Date Dimension	Domain	Sample
Day of Week: String	One of the following: “Sunday”, “Monday”, “Tuesday”, “Wednesday”, “Thursday”, “Friday”, “Saturday”	“Friday”
Month: String	One of the following 12 months in a year: “January”, “February”, “March”, “April”, “May”, “June”, “July”	“January”
Holiday: Boolean	If the following date is a holiday then ‘True’ indicates “yes”, otherwise ‘False’ which indicates “no”	‘True’
Date ID(PK): Int	Unique integer to differentiate each row. Minimum= 0.	101
Location Dimension	Domain	Sample
Population Density: Int	Minimum= 0	1393000
Available Testing Locations: Int	Minimum = 0	28
Public Health Unit: String	One of the following 3 PHU’s: “Ottawa Public Health”, “Toronto Public Health”, “York Region Public Health Services”	“Ottawa Public Health”
Name : String	Either “Ottawa” or “Toronto”	“Ottawa”
Location ID (PK): Int	Unique integer to differentiate each row. Minimum = 0.	1
Weather Dimension	Domain	Sample
Weather Forecast : String	String indicating the weather. Eg. “N/A”, “Snow”, “Blowing Snow”, “Mostly clear”, “Light rain”, “Rain”, “Sunny” etc.	“Cloudy”
location : String	Either “Ottawa” or “Toronto”	“Ottawa”
Date : Date	Four digit year, month, and day of the month	2021-01-01
Weather Forecast ID (PK)	Unique integer to differentiate each row. Minimum = 0.	2

Individual Profile Dimension	Domain	Sample
Age Group : Int	Integer indicating the age group of Individual (eg. 20 for individual in 20s). Minimum=0 and Maximum=200. Null value for when age is unknown.	20
Gender: String	Information indicating individuals gender. Values Include: MALE, FEMALE and UNKOWN(for unspecified individuals)	“MALE”
Case Acquisition	Suspected method of exposure to COVID-19, if known. Values include: “CC” (close contact), “No Epi-link” (no epidemiological link, i.e., community spread), “No Info-Missing”, “No Info-Unknown”, “OB” (outbreak), “Travel”, “Missing Information”, “No known epi link”, “Unspecified epi link”	“CC”
Profile ID (PK)	Unique integer to differentiate each row. Minimum = 0.	402
COVID-19 Information Dimension	Domain	Sample
Daily doses administered: Int	Number of vaccines administered in the given day. Minimum=0.	5415
Individuals fully vaccinated: Int	Number of individuals vaccinated so far(Covid Vaccine such as Pfizer and Moderna issue 2 doses in 2 weeks). Minimum= 0.	0
Total doses given to fully vaccinated individuals: Int	Number of doses issued to fully vaccinated individuals. Minimum= 0.	0
Current hospitalizations: Int	Number of patients currently hospitalized with COVID-19 as measured on “Reported Date”. Minimum= 0.	1158
Current Tests Under investigation: Int	Number of tests pending results as measured on “Reported Date”.	71526
Test outcomes		
Reporting Date: Date	Reporting date of Ontario COVID-19 daily summary.	2021-01-01
Current Patients in ICUs: Int	Number of patients currently in an Intensive Care Unit (ICU) with COVID-19 as measured on “Reported Date”. Minimum= 0.	336

COVID-19 Information Dimension	Domain	Sample
Current Patients in ICUs on Ventilators: Int	Number of patients currently in an Intensive Care Unit (ICU), on a ventilator with COVID-19 as measured on "Reported_Date". Minimum= 0.	221
Change in number of cases from previous day by Public Health Unit: Int	Number of changes in positive cases by PHU from previous day. Minimum = 0.	31
COVID Info ID (PK)	Unique integer to differentiate each row. Minimum = 0.	331

Mobility Trend Dimension	Domain	Sample
retail and recreation percent change from baseline: Int	Changes in recreation and retail activities from baseline(in terms of percentage).	-83
grocery and pharmacy percent change from baseline: Int	Changes in grocery and pharmacy activities from baseline(in terms of percentage).	-77
parks percent change from baseline: Int	Changes in park activities from baseline(in terms of percentage).	-7
transit stations percent change from baseline: Int	Changes in transit station activities from baseline(in terms of percentage).	-86
workplaces percent change from baseline: Int	Changes in workplace activities from baseline(in terms of percentage).	-86
residential percent change from baseline: Int	Changes in residential activities from baseline(in terms of percentage).	33
Mobility ID (PK): Int	Unique integer to differentiate each row. Minimum = 0.	2001

Covid Trends Fact Table	Domain	Sample
Number of Positive Cases: Int	Number of positive cases results as measured on Date dimension. Minimum = 0.	184635
Number Recovered: Int	Number of recovered cases pending results as measured on Date dimension. Minimum = 0.	158472
Number of Tests: Int	Number of tests issued as measured on Date dimension. Minimum = 0.	61401

Covid Trends Fact Table	Domain	Sample
Restriction Zones: String	Restriction issued, measured on Date dimension. Values include: "Control", "Lockdown", "Protect", "Restrict", "Other"	"Lockdown"
Total Case Outcomes		
Date ID (FK): Int	Minimum = 0.	101
Weather Forecast ID (FK): Int	Minimum = 0.	2
Location ID (FK): Int	Minimum = 0.	1
Mobility ID (FK): Int	Minimum = 0.	2001
COVID Info ID (FK): Int	Minimum = 0.	331
Individual Profile (FK): Int	Minimum = 0.	402

Figure 1: Conceptual Model
